

Bubble Snakes

Things you will need:

- 1 empty plastic bottle
- 1 clean sock
- 1 rubber band
- 1 pair of scissors
- 1 bowl

Wash your plastic bottle so it's safe to put your mouth on it.

Adult to use scissors to carefully cut the bottom end off of the bottle. Discard the piece you cut off.

Slide the sock over the end of the bottle so it's stretched tight across the hole. It shouldn't cover the drinking end of the bottle. Secure the sock to the bottle with a rubber band.

Mix your dish soap into the dish with water.

Dip sock end into bubble mixture dish and blow through the mouthpiece.
