

Bring stories to life by making your own Story bag

What is a story bag?

Story bags are fun ways parents/carers can share stories with their child/ren.

A story bag is a bag containing your child's favourite story along with items and materials that could be used as props, to make story time an interactive sensory experience.

How do you make a story bag?

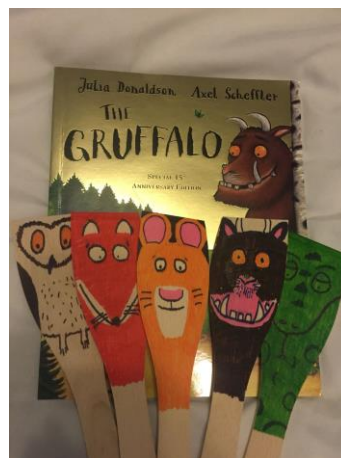

Start by looking around your home for something that you can put your resources in to. For example a cloth bag, pillow case, a basket or box.

Next ask your child to choose a story.

Once your child has chosen their story, it is time to find or make items that can be added to your story bag.

Think about what items could be used to support the story your child has chosen.

For example- if the story was 'Goldie Locks and The Three Bears' then you could add three soft toys and three different sized bowls to your story bag.
