

Do you have a child between 3 and 6 years of age with ASD or ADHD?

Take part in our new virtual-reality study and help us develop the NeuroCave!

At Birkbeck ToddlerLab, we are fine-tuning the CAVE, our **new virtual-reality lab**, for children with neurodevelopmental conditions.

To do so, we are inviting children with ASD and ADHD and their parents to play with us in the CAVE. We will collect their feedback to create **a more inclusive lab and promote the study of neurodiversity!**

If you want to participate or you are interested in hearing more, please contact us at:

fs-neurocave@bbk.ac.uk

Note that if you decide to take part, your child does not have to do all the parts in our study. We will accommodate your child's needs and desires!

WHAT YOU CAN EXPECT?

- To play games in our new virtual-reality room!
- Cool pictures of your child in the virtual-reality room
- All our equipment is safe to use with children
- To wear a cool cap that measures brain activity - like the one I am wearing!
- Reimbursed Travel Expenses
