New Parents Research Opportunity

CUTIE: Exploring the Cutaneous Immune Response to Skin Massage in Early Life: Part 2

What is this study about?

The CUTIE study explores how your baby's immune system responds to skin massage

Why participate?

- Have your baby seen by a doctor working in dermatology
- Make a difference to early life skincare practices
- Understand more about your baby's skin microbiome

Who can participate?

- ✔ Healthy babies born at full term, up to 6 months of age
- ✔ Families willing to participate with study procedures

What's involved?

- 3x 1 hour visits at St Thomas' Hospital, over an 8 week period
- Non-invasive tests including skin swabs, tape strips, skin barrier measurement and skin fluid collection
- A skin prick allergy test to house dust mite, egg, peanut and cow's milk
